D.L. NEU & ASSOCIATES  
INTEGRATED SYSTEMS

The function of D.L. Neu & Associates is to provide service to our clients from the smallest of material handling projects through and including turnkey systems. We specialize in concept layout and detail product/system engineering. We purchase the equipment, install and wire, test run and commission the equipment before turning the system over to the client. Audits are done at 3 and 12 months after start-up at no cost to the user.

We believe the backbone of a systems integrator is the strength of its engineering capabilities. D.L. Neu & Associates is staffed with a core group of experienced engineers in the material handling industry. Our team has experience in a number of different industries including grocery distribution, pharmaceutical, parcel, retail, manufacturing and E-commerce.

Our associates are experienced with the latest technology available in the material handling industry. In addition to being fully trained in Computer Aided Design and SolidWorks, D.L. Neu works only with highly qualified conveyor and pallet rack manufacturers who are among the best in the industry. We are also up-to-date with the latest industry trends, working with most PC and PLC manufacturers including and not limited to: warehouse management systems (WMS), bar code scanners, RF terminals and Pick-to Light. D.L. Neu has the ability to design your turnkey system with the most advanced material handling equipment the industry has to offer.

We believe that experienced project management is a necessity on every turnkey system. Our project managers have extensive field experience. On large scale projects or projects with an accelerated schedule, on-site project management and construction management is a requirement of D.L. Neu's system installation. Our construction managers are among the best in the industry and are experienced in conveyor, rack and electrical installation. In addition, all are fully trained and educated with the latest OSHA, local government and customer requirements.

Our goal is to provide the client with the best material handling solution available at the greatest value. We listen to clients' needs and requirements, knowing that they know their business better than anyone. Once we understand our clients, we are able to design and provide the optimal solution.

D.L. Neu & Associates can also provide the client with a true, long range distribution center plan: what can be done today to fit with tomorrow's goals, while maintaining an acceptable return on investment. Our planning is based on the client's movement data and business growth projections. We put together long range plans and system designs to ensure our clients' growth, minimizing costs when expansion is necessary.

We are committed to excellence in our service to the material handling industry. We promise good work, quality equipment, competitive pricing, and on-schedule performance. Contact D.L. Neu & Associates today for your next material handling project.
